

Rounding

2 Digit: Rounding to the Nearest 10

Answer the questions below.

1. Fill in the missing numbers on the number line below.

What is 53 rounded to the **nearest** 10? How do you know?

2. Label the halfway point on the number line below.

What multiple of 10 is 75 closest to? What problem do you see?

When you come across a number that is an equal distance from both multiples of 10, round UP to the greater multiple of 10.

Example: 75 is the same distance from both 70 and 80, so we round UP to 80.

3. Label the halfway point on the number line below.

What is 25 rounded to the **nearest** 10? How do you know?

Rounding

Answer Key

2 Digit: Rounding to the Nearest 10

Answer the questions below.

1. Fill in the missing numbers on the number line below.

What is 53 rounded to the **nearest** 10? How do you know?

53 rounded to the nearest 10 is 50 because 53 is closer to 50 than it is to 60.

2. Label the halfway point on the number line below.

What multiple of 10 is 75 closest to? What problem do you see?

75 is halfway between 70 and 80. It is equally close to both 70 and 80.

When you come across a number that is an equal distance from both multiples of 10, round UP to the greater multiple of 10.

Example: 75 is the same distance from both 70 and 80, so we round UP to 80.

3. Label the halfway point on the number line below.

What is 25 rounded to the **nearest** 10? How do you know?

25 rounded to the nearest 10 is 30. 25 is the same distance away from both 20 and 30, so I rounded up to 30.
